Subject: COMMERCIAL SEAPLANE OPERATION ON LAKE BURLEY GRIFFIN
Date: Wednesday, 9 June 2021 2:49:56 PM

Introduction

I would like to submit the following objections and comments for consideration in relation to the Commercial Seaplane operation on Lake Burley Griffin in relation to the following use of the lake.

- Sailing Competitions are held on:
 - Tuesday and Wednesday evenings during the Summer sailing period.
 - Saturday and Sunday afternoons during the Summer sailing period.
 - State and National titles held during the Summer months.
 - Sailing classes held during the school holidays.
- Sailability:
 - Sailing on Sunday mornings during the normal Summer sailing period for impaired people conducted by volunteers.
- Use of the lake by:
 - Dragon boats for competition, other recreational boating, hire boats, kayakers and the training of rowers for competition.
- Wind Turbulence:
 - Has consideration been given to the wind turbulence created from Black Mountain in relation to landing and takeoff procedures?
- Dangers relating to the refuelling of the planes and mooring when unable to take off due to unsuitable weather conditions.
- What arrangements have to been considered for the removal of floating logs and debris after heavy rain, as flood waters could be flowing into the lake for several days.

I do not expect my correspondence will make any difference to a decision that has already been made regarding the Seaplane operation.

Kind Regards
Robyn Young
